PROFILE SUMMARY

Hi, I'm John Phillip Lor, an aspiring software developer from Bulacan Agricultural State College. I have a passion for building systems that solve real-world problems. I spend most of my time in Python and Django, but I'm comfortable jumping into Java, PHP, C#, or even hardware troubleshooting. Recently, I led the backend development of GAD Insight, where I gained experience building with AI integrations and Nginx deployments. I'm a big fan of clean code, Object-Oriented Programming, and ensuring projects meet their scope and objectives.

PROJECTS

Title :	Completed Date :
• GADINSIGHT	Mar.29.2025 - Ongoing
A data analytics system made for the GAD office at Bulacan Agricultural State college develop using python data analytics library and django web framework.Hosted at : https://gadinsight.com/
